LucidChart/ LucidSpark

Lucid (Whiteboard)

- Canvas - Move Lucid into your Navigation

Welcome, Kellie

Through Canvas, teachers now receive a free license to the Lucid Education Suite!

The whiteboard has been at the center of the classroom for decades—for good reason. It's a convenient collaboration space where students and teachers can share ideas and organize thoughts.

The screenshot shows the Lucid software interface. On the left is a sidebar with a user profile for 'Kellie Personal', a '+ New' button, and a list of templates including 'Diagramming with Lucidchart', 'Whiteboarding with Lucidspark', 'Create from template', 'Import documents', 'Folder', and 'Enter Join ID'. Below this are sections for 'Templates', 'Education Template...', 'Integrations', and 'Developer'. The main area has a top navigation bar with icons for 'For you', 'AI initiatives', 'Agile', 'Processes', 'Brainstorming', 'Systems', and 'Planning'. Below this is a 'Jump into something new' section with four template cards: 'Thought web weaver', 'Org chart', 'Business process flow example', and 'Database ER diagram (crow's foot)'. To the right of these cards are buttons for 'More templates', '+ Blank whiteboard', and '+ Blank diagram'. A large text box at the bottom of the screenshot contains the following text:

Explored with 2 classes:

- MSBA Predictive Modeling w R
- BSBA Introduction to Python/Excel VBA

7

 CONSTRUCTIVISM	 ACTIVE LEARNING	 METACOGNITION
• Learners build new knowledge by connecting ideas to their existing understanding. • Learning is most effective when students actively construct meaning through exploration, discussion, and reflection.	• Students engage directly with material through doing, discussing, and applying concepts. • Promotes deeper understanding by shifting students from passive listening to active participation.	• Students monitor and evaluate their own thinking, strategies, and understanding. • Strengthens learning by helping students plan, reflect on, and regulate their cognitive processes.
